Letter of Reference:
Clinton Kennet
CK Sound

To Whom It May Concern:

I have known and worked with Clinton Kennet for more than 10 years in a variety of capacities. Clinton's technical abilities with audio equipment, production, installation, and the training of others to use the equipment are superb. Whenever I have seen him work, he brings a first class product to the table while remaining sensitive to the combination of the customers needs and budget.

Clinton is also an excellent creative artist. His ear for what sounds good, how to make musicians sound better through the selection of good equipment that fits them personally, far surpasses most audio technicians. The recording projects I have heard him do have been of new artists with whom I was familiar. The recordings made these new artists sound 10 times better on the CD than they were in person. Clinton consistently brings out the best in people because of his professionalism and his great ability to communicate with and understand people and, in particular, musicians.

Finally, you can trust Clinton. I trust his advice, his integrity and sincerity in trying to help others achieve a level of excellence in a workable fashion. You can take Clinton's word to the bank.

I have absolutely no qualms about strongly recommending to you the services of Clinton Kennet and CK Sound whether it be for recording, live sound production, equipment rental, audio consulting, equipment sales and installation, training of your sound team or even sales and installation of video projection equipment.

Sincerely,

Ross Adelman
